Trailing by 11 points in the second quarter, Atlanta pressured and ultimately forced a turnover that gave them the ball at the Denver 39-yard line. Two plays later, Matt Ryan threw a long touchdown pass to Julio Jones to push the Falcons to a 38-17 victory and the No. 2 seed in the NFC playoffs. The defense still gave the Falcons some problems, but it did allow a 58-yard touchdown pass to RB C.J. Anderson in the second half, a drop by defensive end Adrian Clayborn on a fourth-quarter sideline pass, and a blown coverage that resulted in a 49-yard Rams touchdown in the fourth quarter. But it stopped them in crunch time when it mattered most, as the Rams' first touchdown came on a short run by Todd Gurley.Q: Why is it faster to store a large array rather than multiple smaller arrays? I'm trying to optimize something, and I'm running into a thought train I don't quite understand. I'm keeping a global array (large, about a million items long). I'm looping through it for every user interaction. My thought was to keep the value in the array in a multiple chunk (e.g. 100-200 elements) and saving the access time of those elements rather than the search time of the entire array. 82138339de
